

# FundMe.cash Whitepaper

## **Abstract:**

Be a part of Fundme.Cash improvements to help users get funded faster and make this fundraising platform more transparent, flexible for donors, and profitable for investors.

We are no longer taking fees from users, therefore this platform will be powered by our SLP token. (FMT - FundMeToken)

All campaign participants will get FMT\*\*

## *What is fundme.cash?*

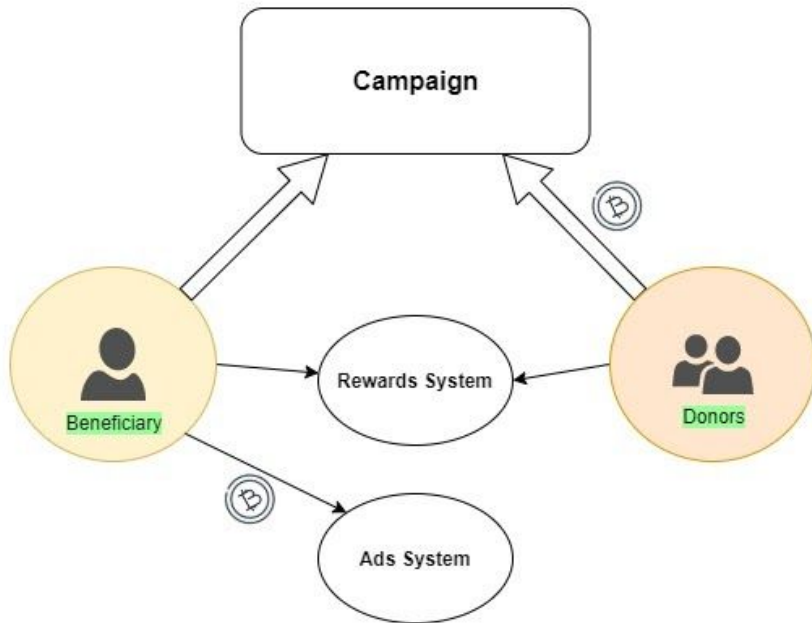

This is a BCH fundraising platform. Users can create a campaign in under 5 minutes. Currently we do not have a for-profit-model. We intend to change that for investors and the fundme.cash team.

## **Proposal:**

### Goal

Update fundme.cash with new features:

- Create and distribute FMT
- Map and build FMT rewards/referral system
- Map and build BCH advertisement bidding system
- Remove fees from platform
- Code new update system
- Integrate telegram notifications
- Create campaign wallet on client side
- Create BCH to FMT swap
- Integrate dividend payment for profit airdrops

### Ads

To advertise campaign will need to pay BCH depending on current bid

### Rewards

Main rule: 1 FMT for 1 referral

### Token Distribution\*\*

All participants of this campaign will get FundMeTokens<sup>1</sup> in proportion 1 FMT for 1000 Satoshi

FMT token total supply:	45,000,000.000 FMT
Distributed in campaign to all participants:	4,500,000.000 FMT (10%)
FundMe Rewards:	18,000,000.000 FMT (40%)
Holding by team:	22,500,000.000 FMT (50%)

### FMT Rewards System

Would be a part of the platform growth plan. All users will have referral links that will be generated in the “SHARE” button. Therefore each time someone registered by your referral link you get 1 FMT.

### Campaign Updates

Updates help beneficiaries to share their later story and news with donors.

### Telegram Notifications

All notifications sent to Beneficiary via telegram bot.

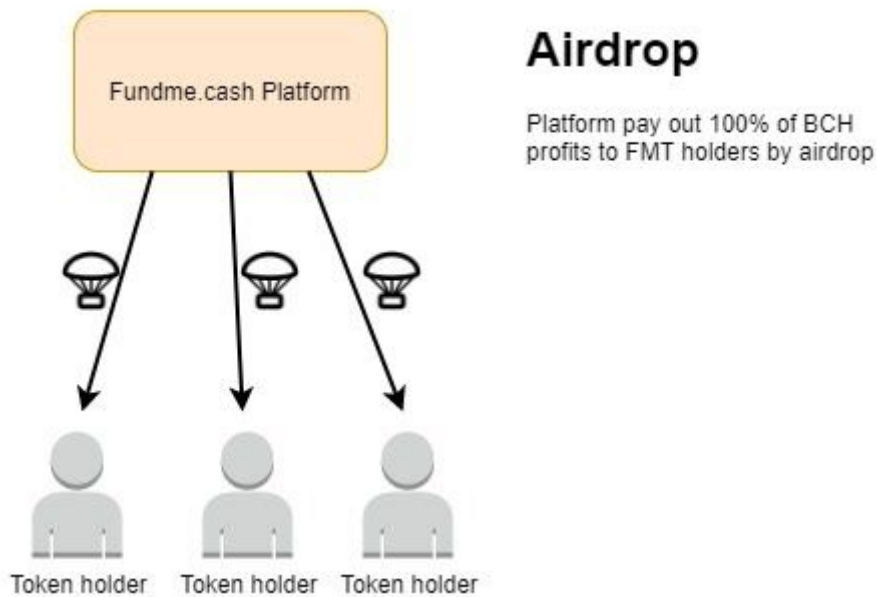

- Campaign donation received
- Campaign fully funded
- Question/comment posted

---

<sup>1</sup> FMT token id: e90e9e632314d7d8ea8151218187a2713804a4670573249daadeccb7f2fed076

## Profit Distributions

We will integrate a method to airdrop all profits to shareholders.

It should be worth noting that any FMT sold for BCH on our swap page will be considered profits and sent out to FMT shareholders with the profits from the site.

## Token driven platform

FMT - FundMeToken will act as a share. We will pay out 100% of the profits to all FMT tokens.

- Advertising campaign will cost BCH depending on current bid (Optional)
- Users will be rewarded with FMT for sharing campaigns (1 FMT for 1 referral )

## Transparency

- When a beneficiary creates a campaign we generate and keep the campaign wallet on our side. In order to make it safer we will remove this and create the campaign wallet on client side
- Open-source all code (after all features ready)
